

Benefit From Course Specific Student Engagement Data by Providing Simple Rostering Data

Providing VitalSource with your LMS/VLE roster allows you to view more accurate student engagement data, including:

- Visibility into which students have engaged with course content, and which students haven't
- An overview of student activity, with a percentage view of general engagement
- No missed analytics for teaching weeks in the semester – roster data allows VitalSource systems to track engagement from the course dates provided, not just for a specified amount of time from the first engagement

By taking full advantage of your investment in VitalSource, your institution will also:

- Reduce the need to manually add links into individual courses, freeing up weeks of work for your campus LMS/VLE team
- Decrease support inquiries from students and instructors around course materials access via the LMS/VLE
- Ensure that 100% of students are licensed the correct learning materials before day one of courses
- Guarantee the best online and offline experience using VitalSource's industry-leading tools

VitalSource is committed to providing students and instructors with the best possible teaching and learning experience while maintaining the highest standards in user data privacy.

LMS/VLE Roster **Frequently Asked Questions**

? Why do you need my LMS/VLE roster data?

At VitalSource, we are committed to helping your institution improve student outcomes while also reducing the cost of course materials. We do this by making it easier for students to learn on day one, and by offering instructors and administrators valuable insights into student engagement. To achieve these goals, we rely on LMS/VLE data to match students and instructors to their assigned course content. Providing your LMS/VLE data to VitalSource automates manual setup processes and offers valuable insights and functionality for your campus.

? What do you do with LMS/VLE data?

We use LMS/VLE data to grant students access to their required learning materials. We also use LMS/VLE data to power VitalSource Analytics, which gives instructors and administrators on your campus access to valuable student engagement data to identify and support at-risk students. We do not share student or instructor information with any third party, unless specifically requested by your institution

? How does my institution provide the roster to VitalSource?

It's easy! All you need to do is securely provide VitalSource a key/secret, to your campus LMS/VLE to access your course section and roster data. Once you've provided us the authorisation via that key/secret we do the rest. Contact your customer success manager to get started.

? When will VitalSource pull LMS/VLE roster data?

We use only the LMS/VLE data that is required to grant students and instructors access to their required learning materials. Once we know a course is using VitalSource technology, we will refresh the data at least daily during the term to ensure data is up to date across the breadth of VitalSource-powered products used at your institution.

? What about data for students not enrolled in courses using VitalSource-powered technology?

Any course not using a VitalSource-powered product or service will be ignored and purged after roster ingestion. Learn more about our commitment to privacy at get.vitalsource.com/privacy-overview.
